

High Output Leadership

Highly effective leadership in a multi-hybrid and agile working world

Leading in a New Dimension

The modern working world is becoming increasingly multi-hybrid: agility and linearity have to be integrated just as much as presence time and home office. The resulting dynamics place new demands on managers and project leaders. They have to ensure a balance between guidelines and freedom through a multi-dynamic management approach. Established leadership tools do not necessarily become obsolete - but managers must apply them in a new way and develop a new understanding of leadership.

Our High Output Leadership program enables you to achieve excellent results in the new working world, from the top of the company to the team on site.

The Modules of our Program:

- Day 1** The origin of High Output Leadership
The new understanding of leadership
The 5 main goals of High Output Leadership
The 5 super values of High Output Leadership
The 4 core elements of High Output Leadership
9 tasks of the modern leader
Decision making in high output mode
Solving problems in high output mode
Promoting Innovation in high output mode
- Day 2** Case studies: individual processing of your real cases and questions

Plus access to our e-learning portal, also beyond the seminar

Certificate: Acornpark® High Output Leader

Dr. phil. Thorsten Knobbe, Head of Training & Education

Thorsten Knobbe is one of the first Betterworks OKR Masters trained in Germany (endorsed by John Doerr) and holds a PhD in Communication Science. His professional background includes Arthur D. Little and Peat Marwick Mitchell (KPMG). As founder of Leaderspoint.de, he is also a digital pioneer. He has been transferring knowledge professionally as a coach and trainer since 1999.
